[1] Beginning with the statement for December 31, 1958, the computed average interest rate on the public debt is based upon the rate of effective yield for issues sold at premiums or discounts. Prior to December 31, 1958, the computed average rate was based upon the coupon rates of the securities. This rate did not materially differ from the rate computed on the basis of effective yield. The Treasury however, announced on November 18, 1958, that there may be more frequent issues of securities sold with premiums or discounts whenever appropriate. This "effective-yield" method of computing the average interest rate on the public debt will more accurately reflect the interest cost to the Treasury, and is felt to be in accord with the intent of Congress where legislation has required the use of such rate for various purposes.

[2] Computed on true discount basis.

[3] By Act of March 17, 1971, the statutory debt limit was established at $400 billion, but was temporarily increased to $430 billion through June 30, 1972.

[4] Dollar equivalent of certificates issued and payable in the amount of 645,000,000 Swiss francs.

[5] Dollar equivalent of Treasury notes issued and payable in the amount of 2,331,000,000 Swiss francs, and 2,500,000,000 Deutsche marks.

[6] Dollar equivalent of certificates issued and payable in the amount of 3,457,000,000 Swiss francs.

[7] Dollar equivalent of Treasury notes issued and payable in the amount of 594,000,000 Swiss francs, and 2,500,000,000 Deutsche marks.

[g] Where these securities were issued wholly or partly in connection with advance refunding exchanges, the Secretary of the Treasury has in some instances declared, pursuant to Section 1037(a) of the Internal Revenue Code of 1954, that any gain or loss on the securities surrendered will be taken into account for Federal income tax purposes upon disposition or redemption of the (new) securities.
