¹ Beginning with the statement for December 31, 1958, the computed average interest rate on the public debt is based upon the rate of effective yield for issues sold at premiums or discounts. Prior to December 31, 1958, the computed average rate was based upon the coupon rates of the securities. This rate did not materially differ from the rate computed on the basis of effective yield. The Treasury, however, announced on November 18, 1958, that there may be more frequent issues of securities sold with premiums or discounts whenever appropriate. This "effective-yield" method of computing the average interest rate on the public debt will more accurately reflect the interest cost to the Treasury, and is felt to be in accord with the intent of Congress where legislation has required the use of such rate for various purposes.

² Computed on true discount basis.

³ Statutory debt limit, established at \$285 billion by the act approved June 30, 1959 has been temporarily increased to \$309 billion until November 30, 1963.

⁴ Dollar equivalent of certificates issued and payable in the amount of 93,000,000,000 Italian lire.

⁵ Dollar equivalent of Treasury bonds issued and payable in the amount of 124,050,000,000 Italian lire, 757,000,000 Swiss francs, 1,100,000,000 Deutsche marks, 650,000,000 Austrian schillings, and 1,500,000,000 Belgian francs.
